Cuidados de la alfombra

Carpet care

Especificaciones técnicas

Technical specifications

Tadi&Imperio1979 S.L. se reserva el derecho de modificar la composición de la trama (parte posterior) de la alfombra en función de la disponibilidad de materias primas. El peso total puede variar. Valor nominal de la alfombra está garantizado y se mantendrá sin cambios.

La calidad de las alfombras está garantizada. Al igual que con todos los productos textiles podrá haber una variación en el tono de un lote a otro. Todas las muestras suministradas están tan cerca de una representación de la alfombra real como el proceso de producción lo permita. El color exacto entre lotes de tinte diferentes no puede ser garantizado.

Tadi&Imperio1979 S.L. reserves the right to change the composition of the jute (backing) depending on the availability of raw materials. Total weight can vary. Nominal value of the rug is guaranteed and will remain unchange.

Rug quality is guaranteed. As with all textile products there will be a variance in shade from batch to batch. Any samples supplied are as close as a representation to the real rug as the production process will allow. An exact colour matched between different dye batches cannot be guaranteed.

Limpieza y conservación

Cleaning & conservation

Se recomienda la limpieza a fondo, como mínimo, una vez al año. Puede utilizarse una tela de algodón de tal forma que sea cual fuese el líquido empleado como producto de limpieza, se transmita sólo la humedad a la alfombra, procurando no empaparla nunca. Se dejará secar durante varias horas. Es importante que la alfombra no sea pisada hasta que una vez seca, se cepille. Para la limpieza deberán emplearse detergentes neutros, se aconsejan los de espuma seca.

Productos que no se deben emplear:

BENCINA: peligro de incendio.

AMONIAO LÍQUIDO: alteración de los colores.

JABÓN y otros detergentes alcalinos.

Cuando se manche la alfombra conviene extraer lo más rápido posible el líquido no absorbido. Se utilizará una tela de algodón absorbente debajo de la misma. Se aconseja durante los primeros meses un ligero cepillado con una escoba blanda (nunca con cuerpos duros). Durante esta limpieza puede que la alfombra pierda algo de pelusa, como consecuencia natural del obligado tundido de la misma durante el proceso de fabricación, o puede que algunos hilos sobresalgan de la superficie del pelo, en este caso es importante no tirar de ellos sino cortarlos con unas tijeras dejándolos al mismo nivel que el resto de pelos. Después, se verificará un barrido diario siempre en la dirección del pelo y una pasada de aspirador semanal no muy fuerte.

PRIMEROS 2 MESES: solo ligero cepillado o barrido.

MESES SUCESIVOS: cepillado + aspirador
LIMPIEZA ANUAL: cepillado + aspirador + producto limpieza + secado + cepillado + aspirador.

We recommend a deep cleaning at least once a year. A cotton cloth can be used in such a way that whatever liquid is employed as a cleaning agent, only moisture is transmitted to the rug, avoiding always soaking it. It should be left to dry for several hours. It is important not to walk on the rug until it is totally dry and brushed. Neutral detergents should be used for cleaning – dry foam ones are recommended.

Should never be used

PETROL: because of fire hazard.

LIQUID AMMONIA: because it damages the colours.

SOAP: because of its alkaline nature.

ALKALINE DETERGENTS: because the rug is attacked.

When staining the rug, the liquid not absorbed should be removed as quickly as possible. An absorbent cotton cloth or blotting paper should be used to remove as much spilled liquid as possible. If the stain is deep and permeates the rug, we recommend placing an absorbent material under it. During the first months, it is recommended a slight brushing with a soft broom (never a hard one). It will be noted during this cleaning the carpet loses some lint: it is a natural consequence of the forced shearing during the manufacturing process, so it is expected to occur. Some strands may protrude from the surface. In that case, do not pull them, cut them with scissors and leave them at the same level as the rest of fur surface. Then it should be daily swept towards fur direction and slightly hoovered once a week. During the first two months, it is recommended not to use a hoover or any cleaning product.

FIRST TWO MONTHS: only slightly brushing or sweeping.

FOLLOWING MONTHS: brushing-hoovering

AFTER ONE YEAR: brushing, hoovering, applying a cleaning product, drying, brushing, and hoovering.
